

78. Some Problems in Number Theory, Analysis and Mathematical Physics, in Mathematics: Frontiers and Perspectives 2000 (IMU).

90. “Non-vanishing of L-functions on \Re(s) = 1,” contributions to automorphic forms, geometry and number theory, John’s Hopkins University Press, (2004), 717-732.

97. (with X. Li), “Number Variance for $SL(2,\mathbb{Z})\backslash \mathbb{H}$,” (revision being prepared).

**LETTERS, LECTURES AND NOTES† (can all be found on:)

† http://www.math.princeton.edu/sarnak/
and http://publications.ias.edu/sarnak

- Notes with Paul Cohen on the trace formula (analytic continuation of Eisenstein series) (1980).
- Comment on Langlands Lecture “Endoscopy and Beyond” (2001).
- Letter to Z. Rudnick on number variance for the modular group (2002).
- Notes on A. Booker’s paper “Poles of Artin $L$-functions and the strong Artin Conjecture” (2002).
- Appendix to S. Miller and N. Sardari “Optimal lifting of integral points”.
