

Princeton-Rider Workshop

Organizers' Statement

Participation in this meeting has been hindered by U.S. Government policy. Fear of harassment at the border inhibited several mathematicians from accepting invitations and others refused to attend in opposition to the policy. The Simons Foundation has stated its opposition to the recently announced executive order.

As organizers of the conference, we wish to state our own opposition to the order and express our support for those who could not attend. We apologize to all those affected by the policy.
